Summary

Final-year Cybersecurity student at Bahrain Polytechnic with hands-on experience in penetration testing, SIEM, threat hunting, intrusion detection, governance, risk and compliance (GRC), and network security through academic and practical projects. Skilled in Wazuh, Nmap, Metasploit, Python, and Cisco networking technologies. Seeking an IT, cybersecurity, or network engineering internship to apply and further develop technical and analytical skills.

Education

Bachelor of Information and Communication Technology - Bahrain Polytechnic | Cybersecurity Major

GPA: 3.72 / 4.0 | Sep 2022 – Present (Expected 2026)

AL Hidaya Al-Khalifa Secondary School

Final Grade: 94.2 / 100 | Sep 2019 - Jun 2022

Experience

Administrative Coordinator | *Khonji Mosque - Quran Memorization Center* Jul 2025 - Dec 2025

- Tracked and recorded students' Quran memorization progress and managed their registration on the Iqra platform.
- Coordinated and logged student examination schedules, ensuring accurate record-keeping.
- Organized events and activities for students, supporting engagement and program participation.

Projects

Threat Intelligence and Hunting Platform

- Deployed a SIEM and SOAR environment using Wazuh to monitor and analyze security events.
- Developed custom detection rules and conducted threat hunting to identify indicators of compromise in a simulated enterprise network.

Technologies: *Wazuh, SIEM, SOAR, Virtual Machines*

Ethical Hacking Assessment

- Conducted a structured penetration test including reconnaissance, exploitation, and post-exploitation activities.
- Documented vulnerabilities and provided remediation recommendations based on risk severity.

Technologies: *Kali Linux, Metasploit Framework, Nmap*

AI-Powered Intrusion Detection System

- Developed a machine learning-based intrusion detection system to monitor network traffic and detect malicious activities.
- Trained and evaluated the model using simulated attack traffic in virtual machine environments.

Technologies: *Python, Machine Learning, IDS, Virtual Machines*

Governance, Risk & Compliance (GRC) Framework in Cyber Security

- Designed and implemented an enterprise GRC framework aligned with aviation industry regulations.
- Configured policy lifecycles, risk assessments, and compliance tracking using Eramba.

Technologies: *Eramba, Security Policy Management, Policy Review & Approval, Control Management*

Defense-in-Depth Network Topology

- Designed and implemented a segmented multi-zone network with perimeter firewalls and a DMZ in EVE-NG.
- Validated network security controls using Nmap to verify firewall rules and segmentation.

Technologies: *EVE-NG, Nmap, Network Segmentation, Firewall Configuration*

Certifications

- Google Cybersecurity Professional Certificate
- Junior Penetration Tester (eJPTv2)
- Cisco Certified Network Associate (CCNA) – (In Progress, Expected October 2026)

Technical Skills

Cybersecurity:

Penetration Testing, Threat Hunting, Vulnerability Assessment, SIEM, SOAR, IDS, Log Analysis, GRC, Risk Assessment

Security Tools:

Wazuh, Metasploit Framework, Nmap, Kali Linux

Networking:

TCP/IP, Routing and Switching, VLANs, Network Segmentation, Firewall Configuration, Cisco Packet Tracer, EVE-NG

Operating Systems:

Windows, Kali Linux, Linux

Languages:

Arabic (Native), English
